

Grants by Grant Cycle

Grants matching your search for **2014-15 Local Conservation Corps Grant Program (RLC29)**

Alameda County

Grantee: Civicorps Schools

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Brian Hickey

CalRecycle Grant manager: Derek Link

Project Summary: Will use funds as reimbursement for allowable costs associated with Grant # RLC29-14-13

Total Awarded for County:\$1,567,229.00

Fresno County

Grantee: Fresno Local Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Shawn Riggins

CalRecycle Grant manager: Dan Wong

Project Summary: With funding provided by CalRecycle, the Fresno EOC Local Conservation Corps will provide recycling services under the newly proposed structure by the state. LCC crews will provide collection services for the following materials; CRV bottles, e-waste and tires, while providing education outreach for oil. The LCC Recycling Department will continue to operate a buy back center in the small town of Friant, which will also collect e-waste and distribute information for oil and tires collections.

Total Awarded for County:\$1,567,229.00

Los Angeles County

Grantee: Conservation Corps of Long Beach

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Mike Bassett

CalRecycle Grant manager: Gwen Oliver

Project Summary: The Conservation Corps of Long Beach (CCLB) will continue recycling collections to local business and Multi-Family complexes. CCLB will now expand education , outreach, marketing and collections to include e waste, tires, and oil. We will work with our local jurisdictions, government agencies and local waste haulers to leverage funding and partner on a variety of grant activities.

Grantee: Los Angeles Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Robert Skillman

CalRecycle Grant manager: Gwen Oliver

Project Summary: The Los Angeles Conservation Corps will take FY 2013-14 recycling totals and increase them by 5% establishing a baseline to calculate FY 2014-15 increases in recycling totals.

LA Conservation Corps crews will continue to provide recycling services to a variety of school, restaurant/ bar and multi-family housing accounts across the County of Los Angeles. Our services take the burden of transporting recyclables to a recycling center away from local schools, businesses and property owners. Out of approximately 800 schools in Los Angeles Unified School District (LAUSD) only 80 schools have a comprehensive CRV recycling program on campus, all of which are currently being serviced by LA Corps. Our crews are also recycling at schools in the Santa Clarita Valley. CalRecycle funded crews to assist school districts in setting up and maintaining school recycling programs. As in the past, the LA Corps will return all revenue to the schools. This year, we will continue to service our existing school accounts and add 8 new school accounts. Finally we will also collect recyclables at local businesses, restaurants and bars as well as multi-family housing complexes. We offer this service free of charge to the community and any revenue received allows LA Corps to further accomplish its mission.

LA Conservation Corps crews provide convenient collection and community outreach services at year-round public events ranging from community parades to tailgating parties at Pasadena's Rose Bowl and the LA Dodger Stadium. Each year, our crews provide recycling collections at over 100 college football games, concerts, golf tournaments and community fairs. In FY2014-15 our crews will continue to provide CRV collections services to only large public events.

If CalRecycle funding from 3 additional sources of used oil, tire and e-waste is granted, we will also implement the following: For e-waste, LA Conservation Corps plans to provide collections of electronic waste and educate the public by partnering up with local jurisdictions to do outreach before events. We plan to also provide staff to assist at these events.

For tire recycling, LA Conservation Corps plans to provide collections of illegally dumped tires on public properties. We will haul away and properly dispose of the tires. We will also provide education and outreach to the public by partnering up with local jurisdictions.

For used oil, we will partner with local jurisdictions to provide education and outreach to the public on proper disposal. We will also conduct site visits to multiple CCC sites and check that their signage is in compliance with regulations.

Grantee: San Gabriel Valley Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Gary Lawson

CalRecycle Grant manager: MaryKay Shafer

Project Summary: Beverage Container Recycling:

1. Collection of CRV beverage containers at businesses, schools, multi-family complexes, and large venues.
2. Provide clean-up at special events.
3. Provide education/outreach/marketing to the public to encourage recycling of CRV beverage containers.
4. Partner with businesses, local jurisdictions or government agencies to provide recycling services.

E-Waste Recycling:

1. Provide event labor/staff resources in partnership with local jurisdictions.
2. Provide education/outreach/marketing to the public to encourage recycling of E-Waste.

Tire Recycling:

1. Provide event labor/staff resources in partnership in local jurisdictions.
2. Provide assistance with tire clean up.
3. Provide education/outreach/marketing to the public to encourage recycling of tires.

Used oil:

1. Partner with local jurisdictions.
2. Provide education/outreach/marketing to the public to encourage recycling of used oil.
3. Provide CCC signage compliance.

Total Awarded for County:\$4,701,687.00

Marin County

Grantee: Conservation Corps North Bay

Amount Awarded: \$1,567,229.00

Grantee Contact: Eli Goodsell

CalRecycle Grant manager: Wendy Box

Project Summary: Grant funds will be used to fund the following activities:

- 1) Used Oil: Activities will include, education and outreach, storm drain stenciling and mapping, distributing oil kits, staffing events
- 2) E-waste: Activities will include, education and outreach, collection services, staffing e-waste collection events
- 3) Used Tires: Activities will include education and outreach, staffing collection events, tire clean-ups
- 4) Beverage Container Recycling: Activities will include collections, litter abatements, special event services and education and outreach.

Total Awarded for County:\$1,567,229.00

Orange County

Grantee: Orange County Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Josh Volp

CalRecycle Grant manager: Dan Wong

Project Summary: Orange County Conservation Corps (OCCC) will continue to provide environmental services to our community and local jurisdictions. OCCC will establish new lines of service by performing public awareness and outreach at local community events to educate the public on the importance of recycling. OCCC crews will also provide support, collection, and distribution of oil, tire, and electronic waste recycling. OCCC will accomplish the above goals by completing the milestone established on the submitted Work Plan. It's OCCC goal to increase the awareness and divert material for our landfills.

Total Awarded for County:\$1,567,229.00

Sacramento County

Grantee: Sacramento Regional Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr David DeMers

CalRecycle Grant manager: Wendy Box

Project Summary: In addition to running a Beverage Container Recycling and Sorting Facility, SRCC will provide recycling collection services for beverage containers and e-waste and will also provide education outreach in the areas of beverage containers, e-waste, used oil, and used tire.

Total Awarded for County:\$1,567,229.00

San Bernardino County

Grantee: Southern California Mountains Foundation

Amount Awarded: \$600,000.00

Grantee Contact: Ms. Sarah Miggins

CalRecycle Grant manager: Gwen Oliver

Project Summary: Providing beverage container recycling and litter abatement programs, recycling activities related to the collection and recovery of used oil and electronic waste and the clean-up and abatement of waste tires.

Total Awarded for County:\$600,000.00

San Diego County

Grantee: Urban Corps of San Diego County

Amount Awarded: \$1,567,229.00

Grantee Contact: Dino Saldajeno

CalRecycle Grant manager: Dan Wong

Project Summary: Beverage Container:

1. Commercial Collection Routes

For FY 2014-2015 Urban Corps will evaluate and educate its current commercial account partners to increase proper diversion of CRV materials.

2. Internship Program

Urban Corps will continue its existing Recycling Internship Program with seven (7) internships sites.

3. Special Events program

Urban Corps will maintain its recycling presence at special events around San Diego County, attending a minimum of twenty-five (25) events.

4. ECO Center Outreach and Education

Urban Corps's Recycling Education and Community Outreach (ECO) Center will continue to serve as a multi-purpose resource center for the entire San Diego region. Urban Corps' goal is to educate thirty-five (35) community groups - or 1500 community members. Furthermore, Urban Corps will train at minimum fifty (50) corpsmembers to lead recycling's education and community outreach projects.

5. Community Beautification

Urban Corps will continue its Community Beautification Program by providing recycling and litter abatement services to four (4) Maintenance / Business Improvement.

6. CRV Fundraising and Education Program

Urban Corps will continue its CRV Fundraising and Education Program with local schools and community groups, providing this program to a minimum of 30 schools or non-profit organizations.

Used Tire:

1. Special Events Outreach

Urban Corps will provide labor/staff and resources partnering with local jurisdictions and community organizations at special events around San Diego County, events promoting used tire recycling programs.

2. School Outreach and Education

Urban Corps' Recycling Education and Community Outreach (ECO) Center will serve as a multi-purpose resource center for the entire San Diego region. Urban Corps' goal is to educate community groups and community members. Furthermore, Urban Corps will train corpsmembers to lead used tire recycling education and community outreach projects.

3. Business and Community Outreach

Urban Corps will work alongside Maintenance Assessment / Business Improvement Districts to promote used tire recycling programs within their local areas.

4. Internship Program

Urban Corps will establish a used tire Recycling Internship Program.

Used Oil:

1. Special Events Outreach

Urban Corps will provide labor/staff and resources partnering with local jurisdictions and community organizations at special events around San Diego County events promoting used oil recycling programs.

2. School Outreach and Education

Urban Corps' Recycling Education and Community Outreach (ECO) Center will serve as a multi-purpose resource center for the entire San Diego region. Urban Corps' goal is to educate community groups and individuals. Furthermore, Urban Corps will train corpsmembers to lead used oil recycling education and community outreach projects.

3. Business and Community Outreach

Urban Corps will work alongside Maintenance Assessment / Business Improvement Districts to promote used oil recycling programs within their local areas.

4. Internship Program

Urban Corps will establish a used oil Recycling Internship Program.

E-Waste:

1. Special Events Outreach

Urban Corps will provide labor/staff and resources partnering with local jurisdictions and community organizations at special events around San Diego County, promoting E-Waste recycling programs.

2. School Outreach and Education

Urban Corps's Recycling Education and Community Outreach (ECO) Center will serve as a multi-purpose resource center for the entire San Diego region. Urban Corps' goal is to educate community groups and individuals. Furthermore, Urban Corps will train corpsmembers to lead E-waste recycling education and community outreach projects.

3. Business and Community Outreach

Urban Corps will work alongside Maintenance Assessment / Business Improvement Districts to promote E-Waste recycling programs within their local areas.

4. Internship Program

Urban Corps will establish an E-Waste Recycling Internship.

Total Awarded for County:\$1,567,229.00

San Francisco County

Grantee: San Francisco Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Ms. Debra Gore-Mann

CalRecycle Grant manager: Wendy Box

Project Summary: The San Francisco Conservation Corps proposes to implement recycling activities including but not limited to beverage container collection, special events, outreach and education and other related recycling activities

Total Awarded for County:\$1,567,229.00

San Joaquin County

Grantee: San Joaquin County Office of Education (dba San Joaquin County Regional Conservation Corps)

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr. Nicholas Mueller

CalRecycle Grant manager: Wendy Box

Project Summary: The overall recycling goal of San Joaquin Regional Conservation Corps (SJRCC) is to provide recycling services to the surrounding and neighboring communities. SJRCC will accomplish this by: 1) Maintaining current Beverage Container Recycling (BCR) clients; 2) Conducting community presentations for all recycling activities; 3) Conducting planning meetings with local jurisdictions; 4) Establishing and maintaining education and outreach activities for all recycling activities; 5) Establishing cleanup and collection events for all recycling activities; and 6) collecting and tracking recycling data for all recycling activities.

SJRCC will determine the outcome achieved through the establishment of baseline data for all recycling activities and data collection and evaluation methods, such as: 1) Compiling volume and/or tonnage for all material types, and comparing it to the previous fiscal year to calculate the percentage change; 3) Conducting pre- and post- surveys of corpsmembers to measure the change in recycling knowledge and awareness; 3) Tracking the number of recycling accounts, events and/or venues, compiling results, and reporting results; and 4) Identifying efforts to reduce greenhouse gas emissions, determining how efforts will be measured, and tracking data, then reporting results in the final report.

Total Awarded for County:\$1,567,229.00

Santa Clara County

Grantee: San Jose Conservation Corps

Amount Awarded: \$1,567,229.00

Grantee Contact: Mr Dorsey Moore

CalRecycle Grant manager: Derek Link

Project Summary: In grant RLC29 the San Jose Conservation Corps will reevaluate their recycling program in order to incorporate the new material categories (E-waste, tires, and used oil) into the program.

The San Jose Conservation Corps will continue the operations related to the existing material category (Bottles and Cans and non-CRV) but at a reduced level than previous years. Before the new material categories can be sufficiently incorporated, the San Jose Conservation Corps will look at their current model and perform a full program evaluation to best determine the best way to address current clients that they work with. Part of this process will be client route efficiency evaluation to determine a more optimized route for pickups. This will be beneficial in multiple ways, such as allowing us to reduce the amount of current clients that will need to be cut from the program, as well as reducing our overall GHG emissions through better routing. Another major part of the process will be meeting with existing special events clients to help determine better ways to staff and utilize staff and Corpsmember time.

The San Jose Conservation Corps staff will work with local jurisdictions and other agencies to establish partnership opportunities to work with and provide education and outreach for e-waste, used motor oil, and tires. Where it is possible, realistic, and feasible, the San Jose Conservation Corps will implement a collection program related to the new material categories; the San Jose Conservation Corps will look into procuring additional vehicles that will be utilized to handle these new material categories as required. The collection of the new material categories can be conducted through a number of ways, such as establishing a collection route similar to our existing system or developing a new collection method, such as distributing flyers to identified material hot spots neighborhoods for special collection appointments. This can be accomplished by utilizing our website, electronic newsletters, and social media.

The San Jose Conservation Corps will continue to use and focus more on the use of the Recycle IQ system to develop a better tracking and reporting system relating to the activities performed for all material categories.

With the inclusion of the other material categories, the San Jose Conservation Corps will conduct research in order to develop internal training tools to educate staff and Corpsmembers. Part of this would also include tapping into local organizations and resources to help provide lectures, educational materials, and field trips to respective material handling facilities. In some occasions, job opportunities may be presented as an option for the Corpsmembers to further their career in Recycling. Our existing internship program within the Recycling Department will naturally expand to include possible internship opportunities for companies, organizations, and/or government agencies that work with these material categories.

The San Jose Conservations Corps will strive to improve its Recycling program developing mechanisms to allow the inclusion of the new material categories, reevaluate and redesign the existing program as needed to optimize operations, utilize data management software to look for trends and improvements, and educate not only the Corpsmembers but also the staff relating to these "new" areas of recycling.

The SJCC is looking forward to working with CalRecycle to complete these goals.

Total Awarded for County:\$1,567,229.00

Tulare County

Grantee: Sequoia Community Corps

Amount Awarded: \$1,567,252.00

Grantee Contact: Ms. Teresa Guzman

CalRecycle Grant manager: Dan Wong

Project Summary: To provide recycling services and implement litter abatement projects related to the collection and recovery of beverage containers, used oil, electronic waste, and waste tires.
Create a new marketing campaign promoting education and collection of electronic waste at all our buy back centers

Participate in (12) twelve events throughout the year where we are promoting and informing the community on the services we provide which encompass Used Oil, CRV, e-waste and tire recycling

Increase the amount of e-waste material we collect by 10%

Increase the amount of CRV material we collect in our Sequoia and Kings Canyon National Forest by 10%

Total Awarded for County:\$1,567,252.00
